SUMMARY	<p>I am a highly skilled software engineer, a graduate of Ton Duc Thang University, currently contributing my expertise at Fintech Innovation Solution Jsc. Experience in analyzing business needs, identifying solutions, and delivering data-driven insights that improve operational efficiency. I excel at bridging technical teams and business stakeholders for project alignment and successful outcomes.</p>
EXPERIENCES	<div><div>Fintech Innovation Solution Jsc 2022 – Current</div><div>Software Engineer</div><div>Spotlight projects</div><div><div>CleverTap Implementation2023</div><div>An integration project with CleverTap, a leading customer engagement and analytics platform. This project involved implementing CleverTap’s SDK into a mobile application, enabling real-time user engagement through personalized notifications, targeted campaigns, and comprehensive analytics to optimize user retention and growth.</div><div>Technical stack: Clickup, CleverTap, 1C:ERP, Flutter</div></div><div><div>Aquatics HUB2024</div><div>The Aquatics HUB is a modern facility focused on providing a variety of aquatic activities for all ages. It includes multiple swimming pools for lessons, fitness classes, and recreational use. The hub also emphasizes water safety education, offering programs that teach essential swimming skills and promote healthy, active lifestyles within the community.</div><div>Technical stack: Clickup, 1C:ERP, React JS, SQL Server, Node JS, Flutter, VN Pay</div></div><div><div>Vietnam Real Estate2024</div><div>Our Vietnam real estate platform offers a comprehensive and user-friendly experience for property seekers, investors, and real estate professionals. The platform is designed to streamline property discovery, provide in-depth project insights, and facilitate user engagement through various tools and resources.</div><div>Technical stack: Clickup, Python, React JS, Cloudinary, SQLite, Postgres, VN Pay, Google auth</div></div><div><div>Motorcycle Retail Management2024</div><div>An online retail store specializing in motorcycle parts and accessories. This project includes a user-friendly interface for browsing products, detailed descriptions, customer reviews, customer loans and a secure checkout process. The platform also offers a blog with maintenance tips, riding safety advice and the latest industry news.</div><div>Technical stack: Clickup, Python, React JS, Cloudinary, SQLite, Postgres, Docker, VN Pay</div></div></div>

EDUCATION

Ton Duc Thang University

Bachelor of Software Engineering

- First prize in Microsoft Make Code Arcade game contest. [Check it out!](#)
-

CERTIFICATIONS

IBM – Applied Software Engineering

CleverTap – Behavioral Analytics

CleverTap – Audience Segmentation

University of California Davis – SQL for Data Science

CleverTap – Mobile Engagement

TOEIC LR 750

TECHNICAL

Analysis Tools: Excel, R, SPSS

Project Management: Clickup, MS, Notion, Lark

Diagramming Tools: Draw.io, PlantUML, Mermaid

Programming: Python, Java, NodeJS, PHP, C#, .NET, 1C ERP, JavaScript, TypeScript, Shell and Bash script

Database: SQLite, SQL Server, Postgres, Redis, MongoDB

Deployment: Docker, IIS

SDLC: Agile, SCRUM, Waterfall

Design: Figma, Davinci Resolve, 3Ds max

Game development: Unity, Microsoft Make Code Arcade

KEY SKILLS

Requirements Gathering & Analysis

Data Analysis & Visualization

Process Modeling (BPMN, UML)

Business Process Improvement

Project Management

Stakeholder Communication & Management

Software Development Life Cycle (SDLC)
